

# TECHNICAL DATA SHEET

## Methylene chloride / Dichloromethane

**Formula:** CH<sub>2</sub>Cl<sub>2</sub>

**Composition Structure:**

**Relative Molecular Mass:** 84.93

It is a Colorless and transparent, without suspended matter.

It's widely used as pharmaceutical intermediates, polyurethane foaming agent / blowing agent to produce flexible PU foam, metal degreaser, oil dewaxing, mold discharging agent and decaffeination agent, and also in adhesive, agrochemical and film industry, etc.

**Packing, Storage and Transportation:**

It should be packed in stoving varnished iron drums with the net weight of 250 or 270kg/drum.

It must be stored in a cool and well-ventilated place.

## COMPOSITION / SPECIFICATION

**Specification:**

Item	Specification
Purity	99.95 min
Moisture	0.008 max
Chroma(APHA)	10 max
Acidity(HCL)	0.0004 max
Residue on evaporation	0.0005 max
Appearance	Colorless, clear, liquid
